

UTSA Quantum Research Cluster

PRESENTS

Dr. Asma Al-Qasimi

Visiting Scientist of Quantum Optics Theoretical
Department of Physics and Astronomy
University of Rochester

September 1, 2021 | 10:00 - 11:00 AM

MEASURES OF QUANTUM ENTANGLEMENT

Entanglement is, according to Schrödinger, “the characteristic trait of quantum mechanics”, and, in the last three decades, it has been accepted as the star that needs to be invested in to build powerful quantum computers. In this talk, I will discuss some measures of entanglement and the ideas behind them, with applications in various physical contexts.
