Summer Research Experience for Undergrads

Dates: May 28th - July 26th

The objective of the CONNECT Summer Undergraduate Research Experience is to provide students a multi-disciplinary environment to learn the science, the politics & policies, as well as the technology enabling advancements in nuclear security.

UTSA is recruiting high caliber undergraduate juniors and seniors from minority serving institutions across the country.

**Areas of Research:**
- Public Policy and Administration
- Fuel Cycle Materials
- Advanced Characterization and Forensics
- Computational Modeling and Data Analytics
- Detection Science

**Benefits Include:**
- Summer Housing
- $5000 in Stipend Awards
- Mentorship
- Network with National Lab Scientists
- Research Poster Presentation

Interested? Applications are due March 21, 2024!
