NASA MIRO CAMEE

CENTER FOR ADVANCED MEASUREMENTS IN EXTREME ENVIRONMENTS

PRESENTS:

2022 CAMEE Student Research Spring Showcase

CAMEE undergraduates and graduate students are invited to present a poster based on research they are actively conducting in one of CAMEE's five focus research areas of Aerodynamics, Atmospheric Science & Extreme Events, Gulf of Mexico & Polar Oceans, Modeling, Simulation & Big Data, and Polar Sea Ice & Sea Level Rise. At the showcase, students are expected to present their research to attendees and faculty judges on one static slide within a 5 minute timeframe. Top posters receive awards at the conclusion of the event.

It is a great opportunity to make connections with faculty, practice communicating science to the public, and network with fellow students. The showcase is open to the public. Please join us to check out the research our students are conducting.
