Biography: Dr. Brian E. Washburn is a Research Biologist with USDA APHIS Wildlife Services, National Wildlife Research Center (NWRC) Sandusky, OH, Field Station. Prior to joining NWRC in 2003, Dr. Washburn was a Postdoctoral Fellow at the University of Missouri (MU), received his Ph.D. at the University of Kentucky, and M.S. at Penn State University. In his current position at NWRC, Dr. Washburn works extensively with colleagues and partners from Wildlife Services research and operations, the U.S. Department of Defense, Universities, civilian airports, state wildlife agencies, nongovernment organizations, and private industry. His research involves basic and applied wildlife ecology studies that provide a better understanding of wildlife movement patterns (e.g., migration ecology), foraging ecology, habitat management, land-use practices, and ecology of wildlife within urban ecosystems. Findings from his research are used to reduce wildlife hazards within and near airport environments. In addition to his appointment with NWRC, Dr. Washburn is an adjunct professor at the University of Missouri, Michigan State University, and North Carolina State University.
