

# HONEY Internships

Immerse yourself in the captivating realm of honey and bee research with our internship opportunities!

- After completing **CURE Lab Research**, **10 top students** are selected annually.
- Selected students receive funded internships for summer opportunities.
- Opportunities span local, regional, national, and international levels.
- Placements include universities, government bodies, non-profits, and private industry organizations.

**Prestigious placements include institutions like USDA Honey Bee Genetics Lab, Texas A&M, Penn State, L-Mesitran, and SweetBio Inc.**

Internships offer hands-on experience in honey and bee science.

Undergraduate research supports career exploration, skill development, and graduate/professional prospects.

Students make impactful contributions to global knowledge through research.
