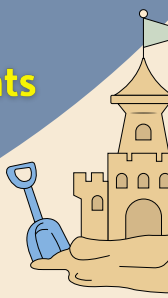
HONEY-Summer Undergraduate Research Experience (SURE)

HONEY PATHWAY
UTSA
The University of Texas at San Antonio
College of Sciences

This program is designed for undergraduate students interested in pursuing graduate school or professional careers and to engage them in research or creative work within their field or a related discipline.

HONEY SURE program offers a unique opportunity to immerse students in scholarly exploration.

Under the mentorship of UTSA faculty researchers, selected students will embark on an 8-week research journey during the summer.



Through hands-on experience and guidance from faculty mentors and graduate or post-doctoral mentors, participants will carry out research projects focused on honey and honeybees related to their mentor's field of study.

Each student will receive

$3,000 for full-time research commitment

Averaging 40 hours per week (320 hours total) over 8 weeks.

***Note: Students must register for at least one UTSA summer course to receive the stipend.**

- Applicants are encouraged to identify a faculty research mentor when applying.
- If no mentor is specified, students will be matched with an available mentor.
- Don't miss this opportunity to gain invaluable research experience and explore your passion for honey and bee-related studies at UTSA!
