

# HONEY Pathway K-12 Teacher Training Program

Unlock the potential of your classroom with our K-12 Faculty Training program!

- The program empowers educators using a **"train-the-trainer"** model.
- Teachers will be equipped to implement **HONEY Pathway** curricular units and establish pollinator gardens or honeybee hives at their schools.
- It will support **4** high school faculty members.
- Participants will be recruited from public schools in the **San Antonio** area.

The immersive experience will be held at **UTSA Main Campus**

Teachers will learn to integrate topics like beekeeping, honeybee biology, medicinal honey, apitherapy, and pollinator-based content into their curriculum

The program also supports establishing hives or pollinator gardens at participants' schools

It aims to enrich teaching methods and inspire future environmental stewards

Selected faculty will participate in a 4-week summer program in July 2025

Participants will receive a \$5,000 stipend
